

What is a Planet for?

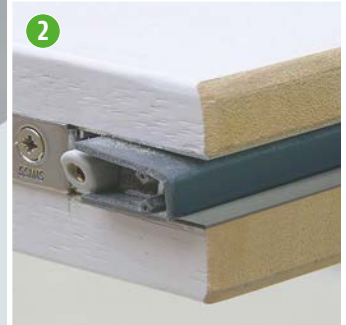

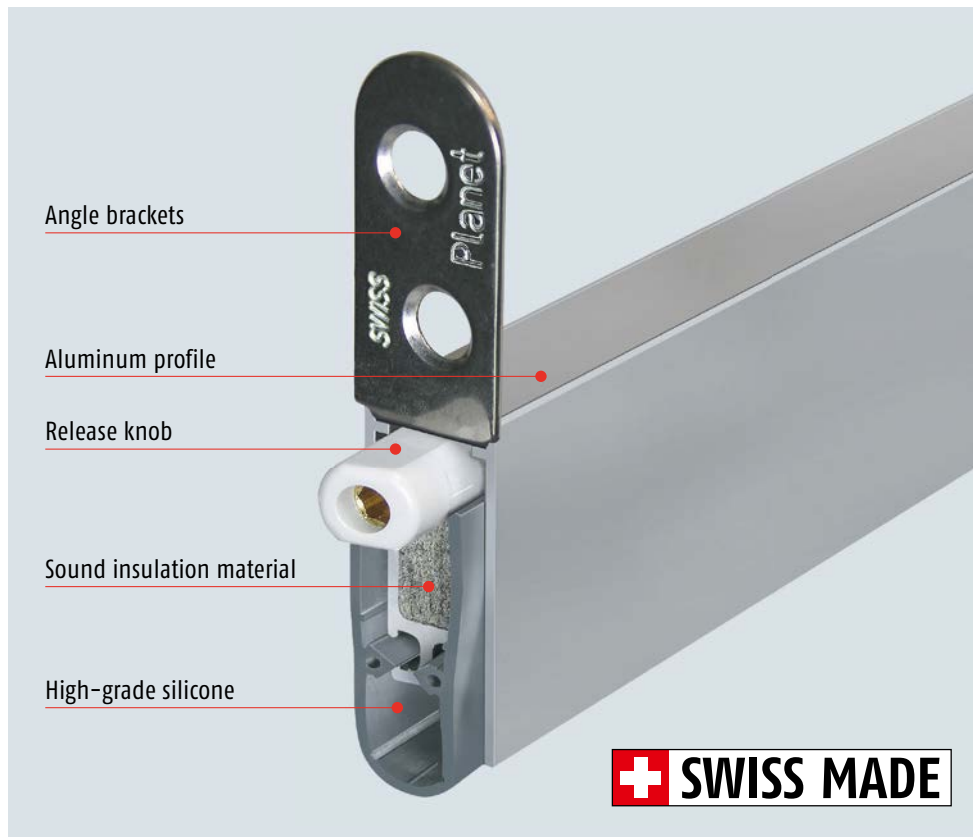

On the illustration on the right side you can see a door **with and without a Planet drop-down seal**. A Planet closes the gap under the door. Light, noise, draught etc. will be stopped.

The Planet drop-down seals fit to **all door materials, door types and floor surfaces**. They can easily be installed at the bottom of doors or face fixed on the side.

On the illustration below you can see how a Planet drop-down seal looks like and how it has to be **installed**. Developed and manufactured to **100% in Switzerland**.

Example with Planet HS

Installation of a Planet drop-down seal

- 1 the door manufacturer grooves the bottom of the door
- 2 drop-down seal is inserted into groove and fastened with angle brackets and screws
- 3 the door has to be assembled and the drop-down seal adjusted – so easy!
